Read more...The present invention relates to a process for coating a substrate, the coated substrate and to a surface-finished coated article. More particularly, it relates to a process for coating an aluminum substrate, especially for coating an aluminum substrate to prevent oxidization of the surface thereof, and to a coated aluminum substrate and a surface-finished coated aluminum article which is coated by the process. It is known to protect a metal surface against corrosion by treating the metal surface with a corrosion resistant compound such as a chromate. Since chromates are a source of hexavalent chromium, it has been desired to find a replacement which will not only provide corrosion resistance to the 2d92ce491b
