By touching a dead body, he is struck by his realization of the fragility of life. But this is no simple coincidence. This is no theory of some forgotten saint of an old religion. The boy, Bharat (Rahul Dev), is the reincarnation of Sita, the youngest daughter of Ram. He is the last of the Ravana's demons and lives with his supernatural companions in a secret cave on the banks of the river, the Ganga. He is also the vessel of great energy, which is being drained from the Ganga to deliver it to the world. Ajay's epiphany and the awakening of Bharat are the key to a peaceful resolution to the hostilities between Hindus and Muslims and the reintegration of Hindus into their traditional lifestyle. The prosecutor at the U.S. attorney's office in Manhattan says she can't comment on ongoing investigations and can't even confirm that the office is investigating -- as recently reported by CNN. "I have learned of media reports that there is an ongoing investigation. I can't confirm that," said A.G. Milstone, a spokeswoman for the office, Friday. "I can't comment on any other aspect of the ongoing investigation." CNN and other news outlets reported earlier this week that federal agents were investigating the "uncompromised" server at Vocus, a call center that provides services to Citibank. The server had records of the kind of phone calls that may have violated the bank's neutrality rules, CNN reported. The New York Times, citing unnamed law enforcement officials, said that investigators were examining whether the company's official language -- English -- was being used to "stifle" other languages. The law prohibits banks from providing financial services to customers who could be detrimental to their businesses, the newspaper said. Federal law enforcement sources told the Times that the server had an "amplified" language that could have been heard throughout the building. The Times said investigators are trying to find out whether the server, which had connections to the Vocus network, helped the company to systematically block calls from Chinese customers. The calls were referred to the social media/mobile service WeChat, the paper said. Vocus, which is traded on the New York Stock Exchange, has announced a \$10 million offering of common stock to cover damages from a data breach that exposed personal data for up to 1 million customers. The information of customers who call the company's call centers was exposed after hackers f3e1b3768c
