Threaded View Update: Thank you all for the suggestions and the support. I ended up getting the older ps2 version and it worked perfectly. I upgraded to the version 10 and no go! I also tried the original ps2 version and it worked, but it wouldn't stay on (starts to start, then turns off). I'm not sure how to proceed since I don't have the newer version of the controller. I tried going to the store and buying the controller and game again, but this time i bought the older one. It started to work, but when I entered into the demo mode it kept saying "controller is not responding."

Changing the mindset of children about HIV/AIDS in North Eastern India. A study was conducted to understand how children in North Eastern India conceptualize HIV/AIDS. Focus groups were conducted in the States of Assam and Arunachal Pradesh with 20 children from each state (10 male and 10 female). Grounded theory method was used to analyze the data. The main conceptualization of HIV/AIDS among the children is that it is a lethal virus that attacks the vital organs. The perceived cause is due to the negligence of healthcare providers in using appropriate treatment to combat the virus. The first line of treatment is prevention through abstinence. Based on the prevalent gender-role concept in the society, children have restricted options to pursue education; hence only males can become professionals. The males believe that they can only have children in future if they become healthy. Hence, the perceived cause of HIV/AIDS is linked to education and employment.

Surveillance of respiratory viruses by using the immunochromatographic strip test for direct detection of influenza viruses, adenoviruses, coronaviruses, and respiratory syncytial viruses in clinical specimens. The results of a study in which we evaluated the performance of an immunochromatographic strip test for direct detection of respiratory viruses in clinical specimens by using reverse transcription polymerase chain reaction as the 2d92ce491b
